storage, retrieval, and processing apparatuses are
widely used in many applications and to many end
users. As the sophistication of the devices used by
such end users increases, the versatility of the
devices may increase to meet the demands of such
end users. For example, it may be desirable for a
device to be able to operate in any orientation, be

scalable, be as compact and lightweight as possible, be expandable, be flexible, and so on. Devices such as hand held devices may be configured to be flexible, in order to allow for a more comfortable and convenient use by an end user. For example, hand held devices, such as mobile phones, may be designed to have flexible portions that are curved or otherwise configured to allow the user to use the device in a more comfortable manner. Flexible portions of devices may be formed using any number of techniques. For example, an elastomeric hinge may be employed 2d92ce491b
