For the last month and a half I've been a part of the Halo online community. Halo 5 was released a couple of weeks ago on the Xbox One, and it is the sequel to 2014's Halo 4. Halo 5 was also released on the Xbox 360, but it's still a few years old at this point. So I'm playing Halo 5 online on my Xbox One until I decide to go back to Halo 4. Modding is a great thing, and I get to do it with my friends. We're all friends in real life, but we aren't in Halo. So, modding gives us a place to hang out and play the game together. Somebody asked me about the best way to mod Halo 5, so I decided to make a video explaining the best way to mod Halo 5 and Halo: The Master Chief Collection. I'm using the Halo 5 Forge, which is a modding program made by the team that made Halo 5. The Forge is pretty easy to use, but there is some stuff that you need to know before you start. The Forge is also very powerful and can do a lot of things, so if you don't know how to use Forge, it might be a bit confusing. And before you start, there are a couple of things you need to make sure you have, so let's get started!

My first suggestion is the Forge Analyzer. This is something that you can put in your Forge folder to make sure that you can use Forge. So let's do that. Alright, so you should be able to open Forge now. You'll have some big warnings about this, but that's fine. So, the first thing you should do is set up Forge the way that you want to use it. So, make sure to uncheck the box next to Offline. In Game Options, make sure to select this. Then, go to the Desktop Options and select that. So, the next thing you should do is start up Forge. So, the top bar should say Forge. You can see the folders that are below Forge and the dashboard below that. So, you can click on the Xbox Live button, and that will start Forge. So, the first thing that you should do is change the color scheme that you want to use. So, the options are here. The 2d92ce491b
