
No Firmware for allwinner a20 tablet

Hey, I have this tablet and i want to change the firmware or change the appearance of the apps installed on it. But i cant find a way to do that. I searched on google and all what i found was how to use the Files app to install the apps and nothing related to the firmware. I'm new to the community and i hope you'll answer my question cause i'm really desperate. I really would appreciate that, thanks!! ReplyDelete.

Replies. Wanna flash a R0.1 bootloader on my R0.1 tablet and my new bootloader is verified and i have everything working. But when it shows up the SMS, there is no option to ask for unlock so i cant use my tablet. Is there a way to solve this without flashing (using 3rd party software) the new bootloader? ReplyDelete. Replies. Hey guys, my Tablet stuck in a bootloop and i used phoenixcard to install a new fresh Android version on it, because nothing else worked.
