
KEYMACRO is a disk and DVD drive utility that offers real-time, full-text searching for text strings such as file names, paths, filenames, and text in the registry, debug messages, debugger files, error codes, etc. KEYMACRO is a free utility that's easy to use. Just start it up, point it at your CD-R/DVD-R drive, and run the script on each directory you want to search. Whether you are looking for debug files, error codes, or the string "Hello", KEYMACRO will find them for you. KEYMACRO also allows you to add any number of keywords to your script and then filter and sort the results by each key. You can then use the auto-complete function to look up a specific string and type just a few letters of the word you are looking for. Keymacro comes with two versions: KEYMACRO Free KEYMACRO Professional KEYMACRO Free offers all of the features of the Professional Edition, but is not able to import the results of an analysis or from another CD or DVD. It has been designed to be used with Windows, but has also been tested on Macs and Linux systems. KEYMACRO Professional offers import and export functions for results of its analysis, which will help you import the results of your analysis or results from another drive, along with a free CD/DVD analysis. Note: To use the "Export results to another drive" option, the drive must be a CD/DVD drive (which means that it can only read the CD/DVD on which you installed KEYMACRO and can't process a CD/DVD in the currently installed drive). KEYMACRO Professional is the only edition of the software that offers a graphical user interface. You can run KEYMACRO in the background, open other programs, or interact with it. Using the scripts, you can export and import a list of drives with their characteristics (for example, you can export the drives of a specific model, brand, etc.). The script for the Professional edition also includes a script for the following disc types: - Audio CDs - CD-R discs - Data CD/DVDs - Data DVD/Blu-Ray discs - Data VCDs - Discs encoded with MP3 - Data DVDs - Movie DVDs - DVD-R discs - Multimedia DVD discs - Multi-session discs - Data CDs 70238732e0
