Rename multiple non-consecutive files, directories, and subdirectories. Free Font Renamer has been reviewed by our team of experts and it is recommended to download and install the latest version to get the best utility for your PC. Several people are complaining that WinRAR is very slow on their computers. While you can always opt for a lighter compression method with a ZIP file, you can also try a different archive utility. WinZip, if you're wondering, is a free program that also has a compression ratio of 0.6. Below is more info on WinRAR vs. WinZip with how they differ, what they're good at, and what they're bad at. Many people around the world have their own reasons as to why they choose WinRAR, while some don't know much about it. If you want to download this program, here's some information to read below. Moreover, the build in compression ratio will be very different from each to the next. This is one of the major differences between WinRAR and WinZip. As stated above, WinZip provides you with a compression ratio of 0.6, while WinRAR does it at 0.58. WinRAR is limited, while WinZip is pretty much everything. Even though the latest WinRAR does increase its compression ratio, it still has a build in time limiter. This is a big deal if you are trying to make space on your HDD. In fact, with WinZip, there is no such thing. WinZip costs \$29.95. Meanwhile, WinRAR is completely free. Also, WinZip is 15MB versus WinRAR which is 8MB. There are many advanced options for WinRAR, as well as many tasks for the one software that is somewhat awkward. WinZip is easy to handle, but not everyone can use it without problems. If you want a lightweight file compression software, you should go with WinZip. However, you should definitely consider WinRAR if you have a huge compressed file that you need to open and unzip.
