Windows 8.1 Calculator

The power of Excel in a small and portable application! Simply fill out an existing or new Excel spreadsheet to save time, rather than try to fill it out manually. Create, insert, edit and format text in existing Excel spreadsheets. Manage any number of cells and ranges in a spreadsheet and insert formulas and functions to automate formulas. Simplify work by performing multiple Excel functions on a single cell. Simply fill out a spreadsheet and save it as a template for future use! Features:

- ✓Automatically fills in sheet names, column and row names and row and column numbers for you so you can start creating your own spreadsheet.
- ✓Automatically calculates cell addresses as you type!
- ✓Save formatted text and formulas to create your own formulas and functions.
- ✓Manipulate and edit data using the built-in formula editor.
- ✓Automatically removes redundant blank rows and columns to save space.
- ✓Manage any number of cells and ranges in a spreadsheet and insert formulas and functions to automate formulas.
- ✓View cell contents, formulas and formatting to view, edit and format data.
- ✓Use built-in functions to simplify formulas.
- ✓Perform complex calculations and functions on cells!
- ✓Delete multiple cells at once.
- ✓Simplify the creation of new spreadsheet projects by creating templates and moving and copying.
- ✓Copy spreadsheet formulas and formatting to new cells for reuse.
- ✓Perform common mathematical functions including: arctan, tan, sin, cos, atan, log and many more.
- ✓Convert numbers from one type to another.
- ✓Format cells.
- ✓Use the built-in number and date functions.
- ✓View the selected cell or range and edit it.
- ✓Use the built-in autofill functions to fill out cells.
- ✓Perform searches for text and number ranges.
- ✓Quickly access cell reference information with the built-in reference manager.
- ✓Convert cell contents to upper or lower case, and more.
- ✓Delete entire columns and rows.
- ✓Perform text and number searches.
- ✓Sort data within and between columns, rows and in multiple ways.
- ✓Paste multiple formats of data.
- ✓Create and copy table styles.
- ✓Automatic numbering of new cells and columns.
- ✓Enable the Ribbon for more control.
- ✓Useful formatting

What's New in the Windows 8.1 Calculator?

Windows 8.1 Calculator is an app created for your Windows operating system that allows you to perform simple and advanced calculations. Easy to install and use The calculator can be found in the

Windows Store and if you have a valid account, all you have to do is click the 'Install' button and the app is automatically added. After installation, you can access it from the Apps section and pin it to the Start Screen for faster access. User-friendly interface Windows 8.1 Calculator displays a very simple and good looking interface. The buttons are smooth, the font looks great and the overall layout of the application follows that of a classic calculator. You have the numerals with basic functions on one side and the buttons for advanced ones on the other. To view your equations, Windows 8.1 Calculator offers you a large, generous LCD-like screen that stretches to the width of your screen. Windows 8.1 Calculator looks well on your monitor but if you find that it takes up too much space, then you can resize and place it on one of the sides of the screen. Doing so will remove the advanced functions but you can bring them back at any time. Basic and scientific functions Windows 8.1 Calculator comes with both simple functions such as add, subtract, multiply and divide which come in handy for everyday use. Along with those, you also get more advanced trigonometry, power, logarithmic and other functions which you can use for more complex problems. The calculator allows you to use a large number of digits to write your equation and if it gets out of the limits of the display, you can use a scroll bar to view it. Pros • A perfect interface • The application is really easy to install • A really good and useful calculator • Has a great capacity Cons • Some functions that you might not find convenient • The application is very small and cannot be easily resized Windows 8.1 Calculator is an app created for your Windows operating system that allows you to perform simple and advanced calculations. Easy to install and use The calculator can be found in the Windows Store and if you have a valid account, all you have to do is click the 'Install' button and the app is automatically added. After installation, you can access it from the Apps section and pin it to the Start Screen for faster access. User-friendly interface Windows 8.1 Calculator displays a very simple and good looking interface.
