Enjoy the New York cityscape!Q: Struts 2 versus I have been working on a Struts 2 project and I am just wondering what is the difference between a and. Do they have a benefit to use them over each other? A: Use for form action. Use and for form input validation (validation groups). Use and for form input input (for example, for adding comments). There's a comprehensive article about form input validation in Struts2. A: A will prevent the button from posting the form to the server if it is not checked. This would only submit the form if blah was selected. If it is not selected it will not submit the form, and the button will not get sent back to the server. A will not submit the form when it is not valid. This would only submit the form if blah was selected. Q: Is it possible to use System.IO.Packaging to access compiled code? I have a simple question that I can't find an answer to, so I'm starting to think I didn't understand the basics. The situation is this; I have a C# program that generates some sort of binary data. I wanted to use the System.IO.Packaging class to deserialize the data, but I can't find out how to access the packed data. I understand that the .NET Framework deserializes.net assemblies from.dll or.exe files, and I want to know if that's how it works for pack files as well. A: Yes, if you look at the
