I guess all that's left for us to do is to wait. Is the app good for what it does? In a nutshell, it does what it says it does. Creating chains in a timely manner, simple to do, intuitive to use and easy to edit. Does it do what it promises? This app can be used to sort out your day in a much more simpler manner. But does it do it better than similar apps? To be honest, it's not an obvious choice to choose this app over similar ones such as Manage Plan, Remember The Milk, Evernote, To-Do List, Tasker or even the Day Timer app for the simple reason that it is not intuitive and does not have the same overall design as other apps. Does it work as advertised? That's up to you to decide, but from my experience it does. Price? The price is "free", but it is open to advertising so if you want to get rid of the advertisements, you can "buy" an Ad-Free version (US\$3.99) and remove the advertisements for that price. Conclusion Chains deserves a chance to be given a real review
