do this, follow these steps: 1. ****Click the Select tool and then click the first image to select it.**** As shown in Figure 8-10, use the **Select > Modify > Expand Selection** command to make the image bigger. In a hilarious turn of events, Leeds United head into the new season after a winless four month spell against Forest Green Rovers. Surely such a catastrophic result cannot be borne by a club that has been in the Championship for six years and worked their way up to

promotion? Surely another root and branch analysis is called for? Unfortunately, the Yorkshire club's owners simply have bigger fish to fry. The chairman is more concerned with getting back on the stock exchange after a staggering £30m loss, than in seeing the club back up the national footballing ladder. With Yorkshire at the centre of the fallout of the worst cup upset in footballing history, Leeds had no chance of fending off relegation. The question is: which relegation? 

What's New In?

“This is a necessary step in moving forward,” said Ngozi Okonjo-Iweala, former World Bank managing director who is set to lead an international investigation into the looting of Nigeria's state oil company. “We are going to find out what's going on and hold people to account. The level of corruption in Nigeria is becoming a cancer, and we have to put a stop to it.” The allegations over the past month have sparked a firestorm of allegations of corruption that has engulfed leaders of the governing party, turning the government into the world's most fragile. The government

of President Goodluck Jonathan fought criticism by insisting it was not aware of the alleged central bank bailout. Just days after media reports that the government had allegedly paid \$23 million to ward off a bank raid in 2011 by AIG, five members of the ruling People's Democratic Party were expelled from the party for corruption. The chief executive of AIG Africa, a unit of New York-based AIG, was arrested in Nigeria and was later convicted of having contributed to a share of the \$3.1 billion scandal in 2012, Bloomberg said. "The investigation now begins," Okonjo-

Iweala said. “I am going to lead a team of international experts, and they will begin to look at the issues.” Another senior state bank official has been put in charge of the investigation, the official said. Corruption is a common sight in the world's seventh-largest economy, and politicians have previously been accused of backing deals to enrich themselves. Corruption is widespread in the oil industry, where billions of dollars go into deals between the state-owned oil company and its international partners. “Nigeria is a failed state. The money is leaking out of the economy, money is being

illegally siphoned out,” Okonjo-Iweala said. “We can deal with a number of the economic issues, but this is not going to be an easy thing to deal with.”
