Try out the free online version of Photoshop (www.adobe.com/products/photoshop.html) and explore the different features and tutorial videos. Just be sure to exercise caution if you're looking to get serious. Editing photos in a public photo-sharing service or on a public website is like throwing gasoline on a fire; it can quickly end up turning into a big problem. ## Exploring Photoshop in an Interview When you're starting out with Photoshop, you likely don't have money to buy software. That's okay. A friend or family member may be able to get you access to an Adobe Photoshop trial, or you can take a digital photography class at the local community college that will teach you everything you need to know about manipulating photographs, and you may get to use Photoshop for the duration of the class. Some colleges offer continuing education classes on digital photography, and they may even be willing to teach you with the possibility of getting paid if the class is in-depth enough. It can even be helpful to ask the public library to suggest resources for you to check out that cover digital photography. Also, search online to find professional photographers who offer digital photography classes for beginners. Never hand over your camera's or other images to someone before you have evaluated them for copyright infringement. If you suspect that the person has claimed ownership, you should contact your attorney to take appropriate action. One of the more valuable lessons is to learn how to take images. Many people think that digital photography is too easy these days because a photo of a sunset taken with a smartphone is immediately accessible to anyone with a smartphone or a free online digital store. Take advantage of your free time and go out to your local park, or take some time to explore a subject you haven't photographed yet. One of the things you'll want to do when you get your hands on a copy of Photoshop is open it up and set up an environment that's completely familiar to you. Try to set up Photoshop as if you were going to be using it on a computer that your family or friends had loaned you for a short period of time. If you want to keep a current copy of Photoshop on your computer, try creating a folder where you store everything about your images. ## Exploring Photoshop in Transition What's that you say? You own a Mac? Did you hear me, I said Mac? There, I said it! Like I care. Anyway, when you get your hands

Many of the people have different goals and different ways to use Photoshop. Many people seem unable to consider that a browser-based image editor is useful. ~~~ citruspi I really don't see how a browser-based image editor is less useful than a desktop editor. How many people do you know that use Photoshop but do all their editing in a browser? ~~~ cpeterso Huh, that's an interesting question. Maybe I am misinterpreting but I thought there were export plugins available that allowed you to control what gets exported? ~~~ ryandvm Hm, you can write your own plugin in python. I was wondering the same thing, particularly since I read about raw image export. I suppose I'm old school enough to still like dealing with files and formats myself. ~~~ yoodenvranx I'm pretty
