.Q: can't connect to oracle database from php code I am new to database programming. I have created a database in Oracle. I am using Squirrel and SQL Developer for my app. I am facing a problem while connecting to oracle database from the app. What I am doing is connect(); \$connectionType=OCI_DEFAULT; \$dbType=OCI_BINARY_FILE;

```
$stmt=OCILogon($conn,$dbName,$dbUser,$dbPass,$connectionType,$dbType);  
$sql="Select * from Accounts"; $result=OCIStmtFetch($stmt, $sql,  
OCI_RETURN_NULLS); while(OCILogOff($stmt, $conn)); ?> But when I run this php  
file it says Fatal error: Call to undefined function OCILogOn() in
```

C:\SQL_Developer\Oracle10\jdbc\ojdbc14.jar\SRC\OCILogoff.c on line 134 Why is it?

A: You are missing a line in your file: return 0; instead of while(OCILogOff(\$stmt, \$conn)); Teacher accused of sexual relationship with student has been removed from the classroom since Spring 2014 This article is more than 2 years old This article is more than 2 years old
